Arizona Big I's Leadership Development Committee

Get Involved—Join Now!

Did you know that as part of your IIBAZ Membership any agent who is “young at heart” and/or has less than 10 years of insurance experience automatically qualifies for participation in the Leadership Development Committee at no additional charge? IIBAZ’s Leadership Development Committee is designed to help up and coming insurance professionals grow within the industry. The Committee is led by volunteer young agents, is very active, and always looking for new individuals to join. One of the easiest ways to get involved with the Committee is to come to the various events we will be holding throughout the year — numerous networking socials and educational programs. There is no additional cost to join the Committee, the only costs associated would be registration fees for attending special events/programs. Get started by completing this application.

There will be many advantages to being involved and we hope you will consider participating. Some of the benefits include:

- Connecting with other industry professionals to create a solid networking foundation.
- Educational opportunities tailored for those growing in their career.
- The ability to learn from others that are the same age and professional status in the insurance industry.
- To better the industry's image through public relations programs.
- Help improve communication skills.
- Help refine marketing and sales abilities.
- Promotion and representation of common business interests.
- Develop an interest in becoming involved with the IIBAZ in a leadership role.
- To provide a resource to State and National associations in carrying out their programs.

Mission Statement:

The fundamental mission is to nurture the careers of individual members of the IIBAZ who are either new to the industry or young. Although there is no age limit, we hope to develop a peer group of young agents. Our objectives are:

- Provide opportunities to foster professional and interpersonal relationships.
- Help develop technical knowledge and expertise.
- Increase membership involvement in the political process and advocate for important industry issues.
